

Diane Da Costa's Favorite Tools for Styling Multi-Textured Tresses

By Diane Lym-Tai Da Costa, Master Curly Textured Expert

It never ceases to amaze me how many options there are for curly hair and the versatility you can offer your clients who have multi-textured tresses. Even though

you have a basic understanding of all types of textures, coloring, softening, relaxing and products to enhance and smooth curly and wavy hair, we haven't covered one of the most important topics – styling tools. So important, in fact, that an entire chapter is dedicated to tools in [Textured Tresses](#), called "*Diane's Bag- Tools You Need for Proper Hair Care.*"

This month you and a few special tools will get a formal introduction. Some are tools I still live by and some are new tools and accessories you can retail to your clients. These days, clients want more for their buck, so why not send them home with great purchases to maintain and style their fabulous new look until they return to the salon!

Professional Tools You Should Use

Sprush: A great tool used to apply color and relaxer services. This easy, washable spatula and brush combination is a wonderful tool that makes your job simple and easy. I just love it. Sprush comes in an array of widths, sizes and colors for all types of application.

"Textured Tresses" by Diane Da Costa

Celebrity stylist and master designer of natural hair, Diane Da Costa provides readers with information on the proper care of natural hair as well as a step-by-step guide on achieving various exciting styles.
